

TasNet Connections

Capability Statement

2025

Who We Are

We make difficult connections easier.

We know how things need to be done, that's the benefit of working with us – we're local, it's our State and it's our future.

Our team knows Tasmania, they have maintained the electricity system here for decades. We'll do the same for you.

We'll give you the right, fit for purpose, solution because we understand your project is unique and needs to stack up in a competitive market. We're committed to Tasmania and the global transition to net zero.

How we work with you

We are relationship builders

We pride ourselves on our deep industry knowledge and local connections.

We are invested

We're committed to Tasmania and the transition to net zero. Our services are structured on a long-term basis – we partner with you for the life of your project.

We are innovators

We collaborate with you and our local suppliers to deliver solutions that support our shared goals.

tasnetconnectionsteam@tasnetworks.com.au

TasNet Connections is a division of TasNetworks, a government-owned energy provider in Tasmania. It focuses on designing, constructing, and maintaining electrical network infrastructure, including connecting new customers to the grid, ensuring network reliability, and supporting network upgrades.

What We Do

TNC's Experience

TNC is the non-regulated subsidiary business of State-owned network provider TasNetworks and brings:

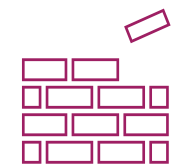

- Transmission network experience in the development and delivery of high voltage transmission infrastructure and renewable energy connections.
- A leadership team with expertise from across the National Electricity Market (QLD, NSW, VIC, TAS) in both the regulated and non-regulated environment.

We Design, Build, Own, Operate & Maintain contestable transmission network infrastructure

Design

Support the development of projects during feasibility, scoping, specifications and detailed design to enable network connection.

Build

Deliver tailored services for all aspects of delivery including design, procurement, construction, testing and commissioning.

Own

Offer flexible capital options to suit transmission network connections in Tasmania over the project/asset lifecycle.

Operate

We care about the long-term health and performance of assets and connection services with established monitoring, operations and maintenance to support ongoing safety and reliability.

Who We Work With

We collaborate with large-scale renewable energy developers working across diverse technologies. While these are core areas of expertise, we are always looking for ways to support emerging technologies and innovations, ensuring our end-to-end solutions deliver seamless integration and optimal performance for every type of project.

Generation

- Hydro
- Wind
- Solar

Load

- E-fuels
- Commercial & Industrial Energy Transition
- Data Centres
- Mining

Storage

BESS

Leadership Team

Our leadership team brings deep industry knowledge and a shared commitment to guiding TasNet Connections into the future.

Gus Bodini

Head of TasNet Connections

Energy and infrastructure industry executive and specialist, with over 20 years of experience planning, developing, investing in and managing renewable energy generation, electricity networks, battery storage and energy zones. Maintaining a deep understanding of the challenges presented by technical, regulatory and financial enablers to reach successful development goals, Gus has been involved in the development and delivery of over \$5b in network connections, transmission network infrastructure and storage projects nationally.

Robert Bell

Commercial Director

Results-driven and accomplished Commercial Director with a proven track record of success in the renewable energy sector. Offering extensive expertise in strategic planning, business development, and operational management for transmission and distribution network providers in Australia. Dedicated to driving sustainable growth and facilitating the transition to a clean energy future.

Nathaniel Dunnett

Technical Director

Senior strategic leader with extensive experience in the electricity industry leading networks strategies, investments and engineering teams across the National Electricity Market, including:

- Customer Connections providing network development and delivery for renewable generation, storage and loads in Tasmania.
- Network Portfolio Management for Queensland’s \$15B+ long term transmission network investment up to 500kV.
- Strategic Asset Management governing \$500M+ annual investment plans, asset lifecycle and risk management.
- Major Project Delivery directing program of work and \$200M+ network infrastructure projects.

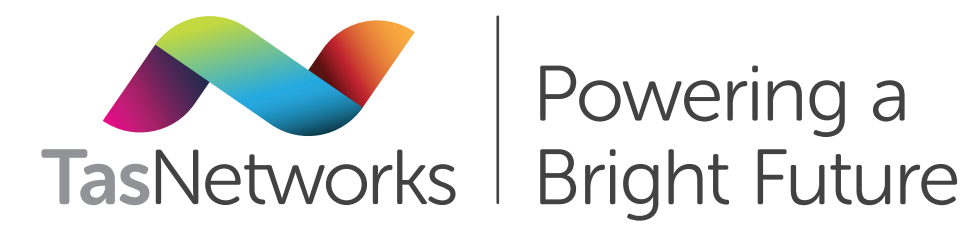

Krista Pentecost

Origination Director

A results-oriented leader with a proven track record of success in the energy industry, spanning across retail, distribution and transmission. Accomplished in sales, marketing and customer experience. A skilled communicator and collaborator who excels at building and maintaining strong relationships and delivering customer-centric outcomes.
