

# **Accredited Electrical Designer and Accredited Electrical Constructor Register**

## **Underground Residential Subdivisions**

Record Number: R0000369615

Version Number: 24

Date: December 2025

Tasmanian Networks Pty Ltd

## **1. Background**

Where a new development is eligible for Connection Choice and the Developer chooses to engage an external party for the design and/or construction of the required electricity reticulation within the subdivision, only Accredited Electrical Designers (AED) and/or Accredited Electrical Constructors (AEC) can be engaged.

## **2. Purpose**

This document provides details of the external service providers that have attained accreditation under the TasNetworks AED and AEC schemes.

For ease of reference, TasNetworks has a resource located online at [www.tasnetworks.com.au](http://www.tasnetworks.com.au) referred to as the Developer's Toolkit, which contains further resources to assist and guide Developers in the development of electrical reticulation and public lighting of their URDs.

The Developer's Toolkit also contains further resources for external service providers wanting accreditation under the AED and AEC schemes.

The AED/AEC Registers below will be reviewed bi-annually. If the AED/AEC has not performed any design or construction work for a Developer in a two-year period, they will be automatically removed from the register.

### 3. AED Register

Service Provider	Business Address	ABN
Contact Electrical	Statewide	37 412 315 074
