1 Introduction

This 2019-20 Public Lighting Services Application and Price Guide outlines TasNetworks' tariff terms and prices applying to the provision of public lighting services from 1 July 2019 to 30 June 2020. The guide sets out the services provided by TasNetworks in relation to:

- the provision, maintenance and replacement of public lighting assets owned by TasNetworks (**public lighting**); and
- the maintenance of public lighting assets owned by customers (**contract lighting**).

These services include the provision, construction and maintenance of new/emerging lighting technology services.

Public lighting services that are not included in this guide are:

- the alteration and relocation of public lighting assets, which is provided on a quoted service basis and categorised as a quoted (non-standard) service¹; and
- the installation of contract lights, which is provided on a quoted service basis and categorised as a quoted (non-standard) service¹.

Further information on TasNetworks' public lighting tariffs can be found on our website at: <https://www.tasnetworks.com.au/poles-and-wires/pricing/Our-prices>.

¹ TasNetworks' quoted services prices are discussed in TasNetworks' *Ancillary Services – Quoted Services Application and Price Guide 2019-20* which can be found at <https://www.tasnetworks.com.au/poles-and-wires/pricing/Our-prices>.

2 Background

TasNetworks operates and maintains the public lighting infrastructure throughout Tasmania on behalf of councils and other Government road authorities. The objectives of public lighting are to provide a lit environment conducive to the safe movement of vehicular and pedestrian traffic, and to promote public security during hours of darkness.

The public lighting services provided to illuminate communal outdoor areas includes the management of luminaires, fixtures, support brackets and control systems.

TasNetworks' public lighting is classified in accordance with AS/NZS 1158 into the following categories:

- **Category 'V'** – generally referred to as major fittings, which is applicable for roads where the visual requirements of motorists are dominant.
- **Category 'P'** – generally referred to as minor fittings, which is applicable for roads where the visual requirements of pedestrians are dominant. Also applicable to outdoor public areas, other than roads, where the visual requirements of pedestrians are dominant, for example, outdoor shopping precincts.

The relevant road lighting authority² will advise TasNetworks of the required category of public lighting services at the time of installation.

As well as the public lighting services discussed above, TasNetworks has an additional category of lighting services, being contract lights.

TasNetworks owns the majority of the luminaires while approximately 75 per cent of public lighting is supported on distribution poles. The remaining public lighting is mounted on dedicated poles, which in most cases are privately owned. There are 27 Local Government Councils on mainland Tasmania plus the Department of State Growth, Tasports, various Government Business Enterprises and contract clients who have some ownership interest in public lighting services, as well as being customers of TasNetworks.

² This could be one of the Local Government Councils or the Department of State Growth.

3 Application of public lighting tariffs

3.1 TasNetworks

All references to TasNetworks within this Public Lighting Services Application and Price Guide, unless otherwise stated, refer to TasNetworks in its capacity as a licensed distribution network service provider in the Tasmanian region of the National Electricity Market (**NEM**) only.

3.2 Goods and service tax (GST)

The public lighting services prices and tariffs outlined in this Application and Price Guide, unless otherwise stated, are exclusive of GST.

3.3 Public lighting charges

Public lighting services consist of the repair, replacement and maintenance of existing public lighting assets as well as the provision of new public lighting assets. The calculation of TasNetworks' public lighting charges is based on the costs associated with installing and maintaining the fitting and the bracket.

Public lighting tariffs do not include charges for the utilisation of TasNetworks' electricity network. Contributions towards the costs of the electricity network are recovered from public lighting customers through separate network tariffs, which are published in TasNetworks' Network Tariff Application and Price Guide³.

The public lighting tariffs within this Public Lighting Services Application and Price Guide are calculated in accordance with the Australian Energy Regulator's (**AER**) Distribution Determination for TasNetworks⁴.

3.4 Invoicing process

TasNetworks raises all public lighting invoices on a monthly basis as per the charges detailed in this Application and Price Guide.

3.5 Change, installation or removal of luminaire

In the case of a newly installed public lighting service, the charge for the provision of the lighting service will apply for the entire month in which the new public lighting service is installed.

In cases where a public lighting service is discontinued, the charge for the provision of the lighting service will apply for the entire month in which the public lighting service in question is removed.

When a change in the type of public lighting service type occurs, (e.g. an 80W Mercury Vapour luminaire is changed over to a 14W LED), charges for the provision of both lighting types will be applied for the entire month in which the change is made.

³ This document can be found at <https://www.tasnetworks.com.au/poles-and-wires/pricing/Our-prices>.

⁴ See <https://www.aer.gov.au/networks-pipelines/determinations-access-arrangements/tasnetworks-determination-2019-24/final-decision>.

4 Assigning and reassigning customers to tariffs

TasNetworks assigns customers' installations/lights to public lighting tariff classes on the basis of the type of public lighting services provided. Installations/lights are assigned to one or more of the following public lighting tariff classes:

- public lighting; and
- contract lighting.

4.1 Assignment of public lighting tariffs

Once a customer's installation/light has been assigned to a public lighting tariff class, or classes, TasNetworks will assign public lighting tariffs based on the customer's choice of fittings.

4.2 Reassignment of public lighting tariffs

Customers seeking a change in public lighting service will be reassigned to a new public lighting tariff at the commencement of the next billing period for the customer where a change is deemed appropriate by TasNetworks.

Customers will thereafter remain on the reassigned public lighting tariff.

A tariff reassignment request may be made:

- a) through the customer's retailer, in which case the retailer will notify TasNetworks; or
- b) through TasNetworks, in which case TasNetworks will advise the customer's retailer.

Where TasNetworks changes the luminaire of an obsolete fitting type to that of a new fitting type, the customer will be reassigned to a new public lighting tariff at the commencement of the next billing period for the customer. Customers will thereafter remain on the reassigned public lighting tariff.

Exceptions to the above conditions will only be made at TasNetworks' discretion where it can be demonstrated that to not do so would result in unreasonable penalties or impose hardship on the customer.

5 Public lighting

5.1 Major fittings

Major public lighting has historically been a combination of light sources, including mercury vapour and low and high pressure sodium vapour luminaires. The majority of new fittings installed for major public lighting purposes are high pressure sodium vapour fittings with in-built power factor correction. Major public lighting is designed and installed on major roads to a specified level, as documented in Australian Standards AS/NZS 1158 Series and AS/NZS 3771 or as requested and agreed to by the respective road authority.

The daily charges for the provision of major fittings for the period 1 July 2019 to 30 June 2020 are presented in Table 1.

Table 1: Major fittings

Fitting type	Tariff (c/day)	Annual charge(\$) ⁵
Current/new fittings		
New technology – major	47.324	173.21
100W sodium vapour	45.517	166.59
150W sodium vapour	47.847	175.12
250W sodium vapour	48.946	179.14
400W sodium vapour	49.493	181.14
250W sodium vapour – flood light	52.247	191.22
400W sodium vapour – flood light	51.670	189.11
100W metal halide	45.885	167.94
150W metal halide	48.007	175.71
250W metal halide	48.831	178.72
400W metal halide	53.069	194.23
250W metal halide – flood light	53.295	195.06
400W metal halide – flood light	53.069	194.23
Obsolete fittings		
125W mercury vapour	45.522	166.61
250W mercury vapour	45.913	168.04
400W mercury vapour	47.292	173.09

⁵ Assumes full year

5.2 Minor fittings

Minor public lighting is installed to a standard; however the spacing of luminaires is usually determined by the existing poles which are available for the mounting of lighting fittings and the costs the road lighting authority will accept. Public lighting in subdivisions with underground supply is installed on dedicated columns that are spaced according to public light spacing specifications for the luminaires used at the time of installation.

The daily charges for the provision of minor fittings for the period 1 July 2019 to 30 June 2020 are presented in Table 2.

Table 2: Minor fittings

Fitting type	Tariff (c/day)	Annual charge (\$) ⁶
Current/new fittings		
14W LED	36.883	134.99
New technology – minor	36.883	134.99
18W LED	37.242	136.31
18W LED decorative	48.858	178.82
25W LED decorative	49.059	179.56
70W sodium vapour	39.272	143.74
Obsolete fittings		
14W LED decorative	36.883	134.99
25W LED	37.442	137.04
42W compact fluorescent	39.030	142.85
42W compact fluorescent – bottom pole entry	39.030	142.85
T5 fluorescent 2 x 24W	40.984	150.00
1x20W fluorescent	40.721	149.04
50W mercury vapour	37.039	135.56
80W mercury vapour	37.025	135.51
80W mercury vapour – decorative	51.582	188.79

⁶ Assumes full year

6 Contract lighting

Contract lighting refers to lights that provide a direct benefit to a particular customer. As part of the contract lighting tariff, TasNetworks is responsible for replacement of the lamps⁷ and control equipment. All other components of the installation, including the light fitting and arm, are the responsibility of the customer as the owner of the light. Contract lighting may be mounted on TasNetworks' poles and connected to the public lighting circuit or supported by private poles or buildings.

The daily charges for the provision of contract lighting for the period 1 July 2019 to 30 June 2020 are presented in Table 3.

Table 3: Contract lighting

Fitting type	Tariff (c/day)	Annual charge (\$) ⁸
Current/new fittings		
14W LED	13.070	47.84
New technology – minor	13.070	47.84
New technology – major	13.743	50.30
18W LED	13.471	49.30
18W LED decorative	13.471	49.30
25W LED	13.471	49.30
25W LED decorative	13.471	49.30
42W compact fluorescent	18.667	68.32
42W compact fluorescent – bottom pole entry	18.667	68.32
70W sodium vapour	18.919	69.24
100W sodium vapour	22.510	82.39
150W sodium vapour	22.749	83.26
250W sodium vapour	22.907	83.84
400W sodium vapour	22.961	84.04
250W sodium vapour – flood light	22.907	83.84
400W sodium vapour – flood light	22.961	84.04
100W metal halide	22.750	83.27
150W metal halide	22.562	82.58
250W metal halide	22.562	82.58
400W metal halide	23.187	84.86
250W metal halide – flood light	22.562	82.58
400W metal halide – flood light	23.187	84.86

⁷ The contract lighting tariff for LED lights does not include lamp replacement as this is not required for LEDs.

⁸ Assumes full year

Fitting type	Tariff (c/day)	Annual charge (\$)⁸
Obsolete fittings		
14W LED decorative	13.070	47.84
50W mercury vapour	18.508	67.74
80W mercury vapour	18.471	67.60
80W mercury vapour – decorative	18.471	67.60
125W mercury vapour	21.625	79.15
250W mercury vapour	21.625	79.15
400W mercury vapour	21.761	79.65
1 x 20W fluorescent	18.547	67.88
2 x 20W fluorescent	18.810	68.84
1 x 40W fluorescent	18.564	67.94
2 x 40W fluorescent	18.844	68.97
3 x 40W fluorescent	22.322	81.70
4 x 40W fluorescent	22.602	82.72
4 x 20W fluorescent	19.336	70.77
60W incandescent	18.396	67.33
100W incandescent	21.595	79.04

7 Procedure for reviewing complaints and disputes

TasNetworks will ensure that all complaints and disputes are dealt with in accordance with our standard complaints and dispute resolution policy and procedures. TasNetworks' dispute resolution policy is reviewed annually and published on our website.

7.1 Internal procedure for reviewing objections

In the event that TasNetworks receives written notification that a customer has an objection to a proposed public lighting tariff assignment or reassignment, the following additional procedures will be followed:

TasNetworks may consult with the customer's retailer during the process of undertaking a review.

TasNetworks will undertake the following internal review process:

- the customer's written objection will be reviewed by TasNetworks;
- additional information provided by the customer (and/or the customer's retailer) will be considered;
- TasNetworks will determine the tariff assignment that should apply;
- the proposed tariff assignment (or reassignment) will be reviewed and approved by the Leader Commercial Solutions; and
- the customer (and/or customer's retailer) will be notified in writing of the tariff assignment review outcome within 15 business days of receipt of the customer's written objection.

7.2 Objection not resolved to satisfaction of customer under internal review process

If a customer's objection to a public lighting tariff assignment is not resolved to their satisfaction after applying TasNetworks' internal review process as detailed above, the customer is entitled to seek resolution through the following avenues:

- if the resolution of the dispute is within the jurisdiction of the Energy Ombudsman, the customer is entitled to escalate the matter to the Energy Ombudsman; or
- the customer is entitled to seek a decision from the AER via the dispute resolution process available under Part L of Chapter 6 of the National Electricity Rules.

7.3 Final tariff class assignment

7.3.1 Initial tariff assignment

If a customer's objection relates to the tariff assigned when the public light was first connected, the original tariff will apply until the objection has been resolved in accordance with these procedures.

If the objection is resolved so that a different tariff is applicable, application of the new tariff will be backdated to the original date of the assignment, and the customer's retailer will be billed accordingly.

7.3.2 Tariff reassignment

If a customer's objection relates to a public lighting tariff re-assignment, the original tariff will apply until the objection has been resolved in accordance with these procedures.

If the objection is resolved so that the re-assignment stands, application of the new tariff will commence at the start of the next billing period, or the originally notified date, whichever is the latter.

8 Obsolete and abolished tariffs

8.1 Obsolete tariffs

There are a number of public lighting tariffs that TasNetworks has classified as obsolete. Obsolete public lighting tariffs are no longer available to new customers. Existing customers may remain on an obsolete tariff providing no alteration is made to the fitting and the fitting doesn't require replacement as a result of a fault.

Obsolete fittings may be either maintained or replaced by TasNetworks at the time of fault rectification. As a general rule, lamps will be replaced with like lamps, whereas fittings (luminaires) will be replaced with a different luminaire type. The replacement fittings used will be in accordance with Table 4.

Customers who choose to transfer or remove an obsolete luminaire will not be able to revert back to that luminaire at a later date.

A current or new fitting must be selected when transferring to a new luminaire.

Table 4: Obsolete fittings

Luminaire (existing)	Category	Luminaire (new)
25W LED	Obsolete	14W LED
42W compact fluorescent	Obsolete	14W LED
42W compact fluorescent – bottom pole entry	Obsolete	14W LED
T5 fluorescent 2 x 24W	Obsolete	14W LED
1x20W Fluorescent	Obsolete	14W LED
50W mercury vapour	Obsolete	14W LED
80W mercury vapour	Obsolete	14W LED
80W mercury vapour – decorative	Obsolete	14W LED
125W mercury vapour	Obsolete	14W LED, 100W sodium vapour or 100W metal halide
250W mercury vapour	Obsolete	150W sodium vapour or 150W metal halide
400W mercury vapour	Obsolete	250W sodium vapour or 250W metal halide

8.2 Abolished tariffs

There are a number of public lighting tariffs that TasNetworks has abolished. Abolished public lighting tariffs are no longer available to any customer, new or existing. Fittings supplied under an abolished tariff will be replaced in accordance with Table 5.

Table 5: Abolished fittings

Luminaire (existing)	Category	Luminaire (new)
32W compact fluorescent	Abolished	14W LED
2x24W compact fluorescent	Abolished	14W LED
1x40W Fluorescent	Abolished	14W LED
2 x 20W fluorescent	Abolished	14W LED
2 x 24W fluorescent	Abolished	14W LED
20 fluorescent 1 x 20FL	Abolished	14W LED
2 x 40W fluorescent	Abolished	14W LED
3 x 40W fluorescent	Abolished	14W LED
4 x 20W fluorescent	Abolished	14W LED
4 x 40W fluorescent	Abolished	14W LED
60W incandescent	Abolished	14W LED
100W incandescent	Abolished	14W LED
30W LED	Abolished	14W LED
88 LED light	Abolished	14W LED
70W metal halide	Abolished	14W LED

9 Glossary

Abolished tariff	Public lighting tariffs that have been superseded and are no longer available to any customer
AER	Australian Energy Regulator
AS/NZS	Australia and New Zealand Standards
Billing period	The period covered by the bill sent to a retailer or customer
Customer	A person to whom TasNetworks provides regulated services
Distribution Determination	AER, Final Decision, TasNetworks distribution determination, 2019-20 to 2023-24, April 2019 (see https://www.aer.gov.au/networks-pipelines/determinations-access-arrangements/tasnetworks-determination-2019-24/final-decision)
Distribution network	As defined in the <i>Electricity Supply Industry Act 1995</i> (Tas)
Distributor	As defined in the <i>Electricity Supply Industry Act 1995</i> (Tas)
Energy Ombudsman	As defined in the <i>Energy Ombudsman Act 1998</i> (Tas)
Network tariff	The schedule of fees (including the rate or rates and relevant terms and conditions) TasNetworks uses to calculate the amount it charges customers, or a class of customers, for network services, as amended from time to time
Obsolete tariff	Public lighting tariffs that have been superseded but remain in place for existing customers until such time as they are rescinded or the electrical configuration of a customer's installation is altered
Road lighting authority	Local Government Councils or the Department of State Growth
TasNetworks	Unless otherwise stated means Tasmanian Networks Pty Ltd ABN 24 167 357 299 in its capacity as a distributor licensed by the Regulator in the state of Tasmania
